Interview social and mobile.m4a

Transcript

00:00:01 Speaker 1

Do I have your permission to record this and your consent for the interview?

00:00:06 Speaker 1

Yes, you do.

00:00:08 Speaker 1

Okay, so I'm researching about how students actually go and form teams for a class project.

00:00:14 Speaker 1

The material version, not the ideal one.

00:00:18 Speaker 1

Okay.

00:00:18 Speaker 1

So walk me through the last time you had to form teams for a class project.

00:00:22 Speaker 1

Start from the moment you found out you need to be in the team.

00:00:27 Speaker 2

The last time was probably this class, the mobile and social computing studio, whatever it's called.

00:00:35 Speaker 2

So I came to class and everybody was already kind of forming groups and I felt really anxious because I don't want to get up.

00:00:43 Speaker 1

Which week was there?

00:00:45 Speaker 2

This was I think week three.

00:00:47 Speaker 1

Okay, yeah.

00:00:49 Speaker 2

And yeah, so the tutor told me to go around and talk to people and find out their interests and see if it matches mine.

00:00:57 Speaker 2

But I didn't want to do that.

00:00:59 Speaker 2

So I ended up creating a group with the same people I sat with.

00:01:03 Speaker 2

And in retrospect, that was a mistake.

00:01:08 Speaker 2

Yeah, I should have gone around and spoken to people.

00:01:13 Speaker 1

So why do you think that was a mistake?

00:01:16 Speaker 1

What made you think that?

00:01:18 Speaker 2

Now that we're working together, I feel like we should have spoken about our capabilities and all of that.

00:01:26 Speaker 2

Cause I feel like a lot of work is being done by one or two people.

00:01:33 Speaker 2

So yeah.

00:01:35 Speaker 1

Okay.

00:01:36 Speaker 1

Now think of the best experience of like a team that you guys have like you were in a team when, okay, best experience when you were in a team for the class project and what was it that made it the best experience?

00:01:53 Speaker 2

That's also a recent one, the one that I'm currently in for software innovations.

00:02:00 Speaker 2

So the thing that I like the most is that all the teammates are kind of very excited about the thing and are equally involved and they take up responsibilities.

00:02:11 Speaker 2

They're also quite understanding when we have other time commitments and so the time period is also set according to all of our schedules.

00:02:21 Speaker 2

so there's a lot of understanding, a lot of cooperation.

00:02:25 Speaker 1

So what was the difference in the formation of the teams in this course, the course, the team which you like and the team you don't like?

00:02:35 Speaker 2

So actually it was pretty different.

00:02:37 Speaker 2

The team that I don't like was basically, yeah, you are supposed to go and talk to people and find people.

00:02:46 Speaker 2

versus the group where I found good people were that there were 12 domains set by the teacher and you can stand in the domain that you're excited about.

00:02:56 Speaker 2

So you're already surrounded by people who are interested in your domain immediately.

00:03:02 Speaker 2

And then you're supposed to just create groups of fours and files and that happened very organically.

00:03:07 Speaker 2

So yeah.

00:03:09 Speaker 1

Tell me about the time you didn't get to choose.

00:03:11 Speaker 1

You were just assigned or ended up in just a random group.

00:03:14 Speaker 1

Walk me through what actually happened in that scenario.

00:03:18 Speaker 2

I don't think it's ever happened in UQ.

00:03:21 Speaker 1

But I feel like there have been some groups which were formed because those people were like late to those classes or something.

00:03:32 Speaker 2

Like that?

00:03:34 Speaker 2

in one of my classes, one member has been added just because he doesn't have any group and we were like four of us.

00:03:41 Speaker 2

And I guess it's okay.

00:03:43 Speaker 1

I mean, what's your like opinion about that?

00:03:47 Speaker 1

Like as a team member being added in your team at the last minute.

00:03:54 Speaker 2

It's okay if he or she is an asset, but...

00:03:58 Speaker 2

If they're not, then it's another burden to carry throughout the semester.

00:04:02 Speaker 1

So far, what do you think is the work being done by all the people or not?

00:04:15 Speaker 2

Yeah, I don't think the new additional member is that interested in the class or the project.

00:04:21 Speaker 2

So I wouldn't say that he's an asset.

00:04:25 Speaker 2

And yeah, he's not contributing much.

00:04:27 Speaker 1

Okay.

00:04:29 Speaker 1

apart from those, these two experiences, when you do get to choose your own team, what's the actual process or when you actually got to choose your team, what was the actual process like if in any course?

00:04:47 Speaker 1

Like apart from those two experiences.

00:04:49 Speaker 2

The other one was last semester where.

00:04:52 Speaker 2

I was sitting with a person and we would just group together because we just met each other and had a good conversation.

00:04:59 Speaker 2

And then we just had to find two more people and we just went around the room asking, are you in a group?

00:05:04 Speaker 2

Are you in a group?

00:05:04 Speaker 2

Are you in a group?

00:05:05 Speaker 2

That's how we found them.

00:05:07 Speaker 1

Okay.

00:05:12 Speaker 1

So I think this is the last question.

00:05:14 Speaker 1

If you were a tutor and had to split the whole class into teams,

00:05:20 Speaker 1

Do you have any suggestion or idea or any process you would follow?

00:05:25 Speaker 2

I think I really like the software innovations where you set the domain, which is already set in most of the classes and ask people to come so that it's more interactive and in real time and people haven't already formed groups prior, you know, personal groups and all that they're not aware.

00:05:40 Speaker 2

So it all happens in class.

00:05:41 Speaker 2

It all.

00:05:42 Speaker 1

Was it done in week one or like any other following week?

00:05:46 Speaker 2

I think it was done in week two.

00:05:49 Speaker 1

Okay.

00:05:50 Speaker 1

So you guys were still like new to each other.

00:05:54 Speaker 1

You didn't know many people.

00:05:56 Speaker 2

Exactly.

00:05:57 Speaker 2

And you were more faithful to our domains because we didn't want to just team up with a random person.

00:06:04 Speaker 2

We wanted to see what we were interested in.

00:06:06 Speaker 1

Okay.

00:06:06 Speaker 1

So is there anything else about forming teams for class project during courses you want to add?

00:06:16 Speaker 2

Yeah, it's hard to find people who are completely into it and people who are not.

00:06:22 Speaker 2

It's very hard to judge that.

00:06:24 Speaker 1

Yeah.

00:06:24 Speaker 2

But a tool that could, give me an overlay of their grades and how much they contribute.

00:06:30 Speaker 2

And prior groups remarks, I feel that should also be done.

00:06:33 Speaker 2

Like a review thing on as a group mate.

00:06:37 Speaker 2

So I would love to read that about people.

00:06:38 Speaker 2

I guess it can be unfair because I feel like I'm a very dominating person in a group thing, but I get **** done.

00:06:45 Speaker 2

So I'm just like might as well.

00:06:46 Speaker 2

You need people like that.

00:06:48 Speaker 1

Yeah, some people are like more organized and have time constraints for each thing.

00:06:53 Speaker 1

And then they come up as dominating, but they are just getting their things done.

00:06:59 Speaker 2

Yeah, like when.

00:07:01 Speaker 2

I feel like I'm too bland when I know something's stupid or like some comment isn't really necessary and it's all ego-based.

00:07:07 Speaker 2

It's very clear to me and I shut it down immediately so that ****** people off.

00:07:12 Speaker 1

Yeah, but I feel like during these class projects it is needed to be transparent for the sake of the project and the grade.

00:07:22 Speaker 2

Yeah, but that's what ends up like we don't end up friends after that project.

00:07:25 Speaker 2

Yeah, but that's fine.

00:07:29 Speaker 1

Thank you so much.

00:07:29 Speaker 1

Thank you.

00:07:30 Speaker 1

That's all.
